PREPARED FOR

The House of Niraava

PACKAGE

Shop Starter

DOCUMENT

NIR-SOW-03

Valid 30 days from issue

A store that sells, and a phone that runs it

You get a complete, live jewellery store — browse, choose, pay — plus a private dashboard where you manage products and orders yourself. Everything after the sale happens where your customers already are.

— What you get

- A live jewellery store your customers can browse, choose from and pay for.
- A private dashboard at **/admin** that works on your phone — add pieces, set stock and prices, move orders, record returns.
- Every order handed to you on WhatsApp with the message already written.
- Four ways to pay: UPI, cards, netbanking, and cash on delivery.

This is a smaller build than our standard Starter Store (₹99,000, 8 weeks), which adds customer accounts, OTP sign-in and automated email. You have told us you would rather answer customers on WhatsApp, so we have left those out — and you can add any of them later without rebuilding the shop.

— How an order actually moves

- **They order and pay.** Razorpay handles UPI, cards and netbanking. Money lands in your account. If they would rather talk first, they reserve the piece and you send a payment link.
- **You confirm on WhatsApp.** The order page hands the customer a pre-written message with the pieces, sizes, total, address and gift note. One tap and it is in your inbox.
- **You pack, ship and close it out.** Add the courier and tracking number; their order page updates immediately. Returns and refunds are recorded on the same screen.

COMMERCIALS

What it costs

One fixed price. No platform subscription, no per-order commission, no licence renewal.

LINE ITEM	AMOUNT
Design system & responsive UI Palette, typography, components and every screen at three widths	₹11,000
Storefront build Ten page types, search, bag, wishlist, filters, policy pages	₹17,000
Hosted database & order persistence Catalogue and orders stored server-side, in your account	₹7,000
Checkout & Razorpay integration UPI, cards, netbanking, COD, server-side signature verification	₹8,000
Admin dashboard Products, orders, customers, discounts, settings	₹11,000
WhatsApp order desk & returns workflow Nine pre-composed messages, return and refund handling	₹3,000
Technical SEO, deployment, handover & training Domain and hosting setup, walkthrough session, written guide	₹2,999
Subtotal	₹59,999
Launch offer — first jewellery client	−₹20,000

Payable ₹39,999

₹39,999 is what you pay. We are not GST registered, so no tax is added and no tax invoice is issued. If our registration completes while your project is running, we will tell you before it affects any invoice.

— Payment schedule

On acceptance, to begin (40%)	₹16,000
On approval of staging (40%)	₹16,000
On go-live and handover (20%)	₹7,999

Completion means the build is finished, tested and signed off on staging. Go-live follows the final payment, not the other way round.

— Delivery — 3 weeks

STAGE	WHAT HAPPENS	DAYS
Kick-off	We collect your product list, photographs, descriptions, WhatsApp number and business details.	Days 1-2
Design	Home, product and checkout screens for your approval. Two rounds of revisions are included here — this is where changes are cheap.	Days 3-6
Build	Storefront, admin dashboard, database and payments. Your catalogue loaded with real photographs, prices and stock.	Days 7-12
Review	A private staging link. You place test orders, we fix what you find, and we walk you through the dashboard on a call.	Days 13-14
Launch	Domain pointed, payment keys switched to live, sample data cleared. The shop is open.	Day 15

Timelines run from signed scope and receipt of client assets. Delays in client input or feedback extend the timeline day for day.

AFTER LAUNCH

When you outgrow WhatsApp

Each of these bolts onto the shop you already have. Nothing gets rebuilt, and there is no rush — most shops run happily on WhatsApp for a long time before they need any of it.

WHAT IT ADDS	PRICE
Customer accounts & order history Sign-in, saved addresses, past orders in one place	₹12,000
OTP login & automated SMS Order and shipping messages; needs DLT registration	₹9,000
Automated transactional email Order confirmation, shipping and abandoned-bag messages	₹6,000
Courier API integration Shiprocket or Delhivery — automatic labels and live tracking	₹8,000
WhatsApp Business API Automatic order messages instead of one-tap manual sends	₹9,000
Blog or lookbook A content section you edit yourself	₹7,000
Analytics & ad tracking setup Google Analytics, Meta Pixel and conversion events installed	₹4,000
Multi-user admin with roles Separate logins for staff, with limited permissions	₹6,000

— Support after launch

- **30 days of free fixes** — anything that does not work as described here.
- A recorded walkthrough of the dashboard, plus a written guide you keep.
- Work beyond the warranty is quoted as a fixed scope before it begins. We do not bill by the hour.

— Outside this engagement

- Product photography, styling and retouching
- Social media and influencer work
- Writing your product descriptions
- iOS and Android apps
- Drafting or reviewing your legal policies
- Marketplace sync — Amazon, Myntra, Nykaa
- Paid advertising and campaign management
- Multi-currency and international shipping

Policies and compliance are yours

We build, style and publish your terms, privacy, returns, refund and shipping pages, and tell you what headings each needs — but the wording and its compliance with the Consumer Protection (E-Commerce) Rules, the IT Rules and GST rest with you. We are a development studio, not a law firm.

— Terms

- This quotation is valid 30 days from issue.
- Two rounds of revisions are included at the design stage.
- UAT covers defects against the agreed scope. New functionality identified during testing is quoted separately.
- On final payment, all code, design files and accounts transfer to the client.
- Hosting, domain and gateway accounts are created in your name, not ours.

A live store your customers can buy from, a dashboard you can run from your phone, and every order handled on WhatsApp — for ₹39,999, in 3 weeks.
