Product catalogue *template*

The exact fields we ask every client for before a single page is built. Fill one row per variant in a spreadsheet with these column names, and the build starts the day we receive it.

01 Columns, in order

COLUMN	WHAT GOES IN IT	EXAMPLE
`sku`	Your unique code per variant. Letters, numbers, dashes.	KURTA-BLU-M
`title`	Product name as customers should see it. No SKU, no all-caps.	Indigo Block-Print Kurta
`category` / `subcategory`	Two levels. Keep the list short and consistent.	Women / Kurtas
`description`	Two to five sentences. Fabric, fit, care, what makes it yours.	Hand block-printed cotton…
`price_inr`	Selling price including GST, whole rupees.	1499
`compare_at_price_inr`	Optional. The struck-through price, if any.	1999
`gst_rate_percent`	0, 5, 12, 18 or 28. Ask your CA if unsure.	5
`hsn_code`	4 to 8 digits. Needed on every invoice.	6204

`image_1` … `image_5`	File names of the photos, matching the files you send us.	kurta-blu-1.jpg
`tags`	Comma-separated. Used by search and filters.	cotton, block print, summer
`status`	active, draft or archived.	active

02 Photography spec

- [ ] **One consistent background**
  White or a single warm neutral, for every product. Consistency sells more than quality.
- [ ] **Square, at least 1600×1600 pixels**
  JPG or PNG. Name files by SKU: `KURTA-BLU-M-1.jpg`.
- [ ] **Front, back, one detail, one in use**
  Four photos per product is the floor for conversion. Variants that differ only in colour need one photo each.

03 Before you send it

- [ ] **Every SKU is unique and every variant has its own row**
- [ ] **Prices include GST and the rate column matches your CA's list**
- [ ] **Weights and dimensions are for the packed parcel, not the bare product**
- [ ] **Photo file names match the image columns exactly**
