

E-commerce Store & Admin Dashboard

A complete online jewellery store, with orders, payments and returns run from a phone.

PREPARED FOR

The House of Niraava

PACKAGE

Shop Starter

INVESTMENT

~~₹59,999~~ **₹39,999**

DELIVERY

3 weeks from kick-off

QUOTATION VALID

30 days from issue

DOCUMENT

NIR-SOW-03

What you get

- A live jewellery store your customers can browse, choose from and pay for.
- A private dashboard at **/admin** that works on your phone — add pieces, set stock and prices, move orders, record returns.
- Every order handed to you on WhatsApp with the message already written.
- Four ways to pay: UPI, cards, netbanking, and cash on delivery.

This is a smaller build than our standard Starter Store (₹99,000, 8 weeks), which adds customer accounts, OTP sign-in and automated email. You have told us you would rather answer customers on WhatsApp, so we have left those out — and you can add any of them later without rebuilding the shop.

What it costs

One fixed price. No platform subscription, no per-order commission, no licence renewal.

LINE ITEM	AMOUNT
Design system & responsive UI Palette, typography, components and every screen at three widths	₹11,000
Storefront build Ten page types, search, bag, wishlist, filters, policy pages	₹17,000
Hosted database & order persistence Catalogue and orders stored server-side, in your account	₹7,000
Checkout & Razorpay integration UPI, cards, netbanking, COD, server-side signature verification	₹8,000
Admin dashboard Products, orders, customers, discounts, settings	₹11,000
WhatsApp order desk & returns workflow Nine pre-composed messages, return and refund handling	₹3,000
Technical SEO, deployment, handover & training Domain and hosting setup, walkthrough session, written guide	₹2,999
Subtotal	₹59,999
Launch offer — first jewellery client	−₹20,000
Payable	₹39,999

₹39,999 is what you pay. We are not GST registered, so no tax is added and no tax invoice is issued. If our registration completes while your project is running, we will tell you before it affects any invoice.

Payment schedule

On acceptance, to begin (40%)	₹16,000
On approval of staging (40%)	₹16,000
On go-live and handover (20%)	₹7,999

Completion means the build is finished, tested and signed off on staging. Go-live follows the final payment, not the other way round.

Delivery — 3 weeks, in 5 stages

The clock starts when your material reaches us, not on the day the invoice is paid.

STAGE	WHAT HAPPENS	WORKING DAYS
Kick-off	We collect your product list, photographs, descriptions, WhatsApp number and business details.	Days 1–2
Design	Home, product and checkout screens for your approval. Two rounds of revisions are included here — this is where changes are cheap.	Days 3–6

STAGE	WHAT HAPPENS	WORKING DAYS
Build	Storefront, admin dashboard, database and payments. Your catalogue loaded with real photographs, prices and stock.	Days 7-12
Review	A private staging link. You place test orders, we fix what you find, and we walk you through the dashboard on a call.	Days 13-14
Launch	Domain pointed, payment keys switched to live, sample data cleared. The shop is open.	Day 15

Timelines run from signed scope and receipt of client assets. Delays in client input or feedback extend the timeline day for day.

Support, add-ons and what is not included

Support after launch

- **30 days of free fixes** — anything that does not work as described in this document.
- A recorded walkthrough of the dashboard, plus a written guide you keep.
- Work beyond the warranty is quoted as a fixed scope before it begins. **We do not bill by the hour** — you get a price before the work starts, never an invoice after it.

When you outgrow WhatsApp

Each of these bolts onto the shop you already have. Nothing gets rebuilt, and there is no rush — most shops run happily on WhatsApp for a long time before they need any of it.

WHAT IT ADDS	PRICE
Customer accounts & order history Sign-in, saved addresses, past orders in one place	₹12,000
OTP login & automated SMS Order and shipping messages; needs DLT registration	₹9,000
Automated transactional email Order confirmation, shipping and abandoned-bag messages	₹6,000
Courier API integration Shippo or Delhivery — automatic labels and live tracking	₹8,000
WhatsApp Business API Automatic order messages instead of one-tap manual sends	₹9,000
Blog or lookbook A content section you edit yourself	₹7,000
Analytics & ad tracking setup Google Analytics, Meta Pixel and conversion events installed	₹4,000
Multi-user admin with roles Separate logins for staff, with limited permissions	₹6,000

Outside the engagement entirely

- Product photography, styling and retouching
- Writing your product descriptions
- Drafting or reviewing your legal policies
- Paid advertising and campaign management
- Social media and influencer work
- iOS and Android apps
- Marketplace sync — Amazon, Myntra, Nykaa
- Multi-currency and international shipping

Policies and compliance are yours

We build, style and publish your terms of use, privacy, returns, refund and shipping pages, and tell you what headings each needs — but the wording, its accuracy and its compliance with the Consumer Protection (E-Commerce) Rules, the IT Rules, GST and any other applicable law rest with you. We are a development studio, not a law firm, and nothing here is legal advice.

Terms

- This quotation is valid 30 days from issue.
- Two rounds of revisions are included at the design stage; further rounds are quoted separately.

- UAT covers defects against the agreed scope. New functionality identified during testing is quoted separately.
- On final payment, all code, design files and accounts transfer to the client.
- Hosting, domain and gateway accounts are created in your name, not ours.
- We may show the finished store in our portfolio unless you ask us not to.
